MAY 2020

Dear Valued Customer:

CBH CO-OP has established a program to provide you with warning and safety information about propane gas. If you are a propane gas user, the enclosed information is **VERY IMPORTANT**. We encourage you to read the **Important Propane Safety Information** pamphlet that we have enclosed in this mailing.

When handled wisely and with respect, propane gas is a safe, efficient and clean fuel. To stay in compliance with propane insurance standards, our insurance company is requiring a leak check, regulator date verification and possible replacement of the regulator if it is out of date, on all propane systems.

If you have not had a leak check done on your home and/or business within the last five (5) years, we are required to do so. Leak checks are being scheduled and a CBH CO-OP service technician will be contacting you shortly to schedule one at a convenient time for your home and/or business.

If you have specific questions about propane gas or our services, please contact your local propane provider at the numbers listed above.

Having a safe system is important to you and to us. Thank you for your understanding and your cooperation.

We appreciate your business!

Sincerely,

Amanda Maine  
CBH CO-OP Director of Risk Management
