

The Stock Step

Features:

- Durable concrete pad system
- Pads form an apron around the base
- Pad strength and structural integrity ensured with fiber bar, rebar, and fiber mesh
- Available for circular, square, and rectangular water tanks
- Easy moving with pallet forks or built-in loops

Benefits:

- Helps prevent mudholes around tanks
- Aids in preservation of tire tank seals
- Ensures that calves can always reach water
- Fully removable
- Save on costly hoof-rot treatment and animal loss resulting from waterholes
- No more hauling in gravel or digging holes in your pasture to repair around water tanks
- Eliminates ripping out permanent concrete when the inevitable tank repair is required

Stock Steps are on display in front of our Belle Fourche Feed & Ag location. For more information please stop in or contact one of the locations below.
